Summer Research Internships for High School Students

Syracuse University's College of Engineering and Computer Science invites local high school juniors to apply for a Summer 2017 Engineering & Computer Science Research Internship. This six-week non-residential program is an opportunity for students to work directly with SU research professors, graduate and undergraduate students on a specific research project. Interns will be selected through a competitive application process.

Selected students:

- participate in a university level research project
- are mentored by SU research faculty, graduate and undergraduate students
- work in state-of-the-art research facilities
- join the other high school research interns for fun activities and informational lunches aimed at easing the transition from high school to college
- compete in a poster symposium with other high school and undergraduate research interns

Program Details and Applications are available now and can be found on-line at: <http://highschooleng.research.syr.edu>. Applications are due **March 3, 2017**.
